

UFO Sightings in the Bridgewater Triangle

Town	Street	Description	Area	Date	Time
	At the junction of routes 24 and 106.	It was shaped like home plate on a baseball diamond, with a bright red light on its top, a powerful white headlight at the point on the bottom, and rows of white and red lights around the edges.	Up in the sky.	3-23 1979	
Bridgewater	Belmont St	It appeared as red light like on a radio tower. Then it started to self-glow so I could see it's true shape, as it started throwing sparks from it's underside. One minute later, it flew over our heads. It was as big as a house, had turned off it's lights and didn't make a sound as it glided over our heads. It was so close that I could of hit it with a rock.	Up in the sky.	1975	
Bridgewater	Oak St	Three white disc shaped flying saucers were seen through a telescope following an American spaceship. One was in front, one was on the left side, and the other was on the right side of the craft.	Up in the sky.		Afternoon.
Bridgewater	High St	It appeared to be a green, disc-shaped flying object of about the same size of an average sized plane with a big round yellow spot-light that the witness says was the very brightest she's ever seen. It was seen moving slower than a plane could ^{50'} over some trees. It was only until it suddenly stopped then tilted itself while hovering over some trees that 5 large red lights & 4 small yellow lights were ^{seen} in a circular position surrounding a huge lightgreen light that was in the middle. But none of the lights were touching each other. It never made any kind of sound as it pointed its very powerfull spotlight on the ground that lit up a very large area, VERY BRIGHTLY!"	Up in the sky.	1-10 1991	10:30PM.
